

AMENDMENTS TO THE SPECIFICATION:

Please substitute the following amended paragraph for the pending paragraph beginning on page 9, line 28.

The link facility 22 can further generate or insert a link into a document in order to allow content associated with that link to be incorporated into the document at the appropriate time. For example, the link provides for the ability to ensure that updated content associated with the link is inserted at a selected document location. This methodology provides for an easy to use system for dynamically inserting rapidly, periodically, changing content into the document.
